| ▪ Mongo                         | ▪ Photoshop             | ▪ Unity          |

## PROJECTS

---

**Movie Database:**

Built a web application with the help of MERN stack (MongoDB, Express.js, React and Node.js). Testing the application side with Matcha-chai and webAPI with Postman.

**World Cup Application:**

An application built with Java/Javafx/html that allows for creation, control, and viewing of the World Cup and its participants. It has a multithreading implementation for client/server communication, with different views for admin vs client.
